

# COPILOT READINESS ASSESSMENT

Measure Your Organization's Potential Exposure in Just a Few Clicks

## KEY FEATURES

### *Complete Environment Scan*

We scan your Microsoft 365 and Power BI tenant, assessing permissions and exposure levels to help secure sensitive data from unauthorized access.

### *Risk Identification & Mitigation*

We assess file sensitivity and exposure to identify risks, adjusting criteria for organizational needs. The interactive dashboard streamlines remediation by offering direct options to mitigate risks.

### *Tailored Security Policies*

We provide customizable policies for enhanced data security and compliance, applicable at user and tenant levels to prevent data breaches, while offering organization-level insights into potential vulnerabilities.

### *Client Reassurance*

Your data security is prioritized as our tool scans an image of your environment without accessing actual data, ensuring that no information is exposed while identifying risks.

## ASSESSMENT PROCESS

### Step 1:

Obtain M365 Global Admin access (or opt for temporary access)

### Step 2:

Run a 24-hour assessment to evaluate security, permissions, and compliance

### Step 3:

Receive a detailed report for M365, covering all Microsoft applications, with actionable insights and recommendations.
