CORE INSIGHTS

Strategic Cybersecurity Leadership – Scaled to Your Needs

Virtual Chief Information Security Officer (vCISO) services

At **Core Insights**, our Virtual Chief Information Security Officer (vCISO) service provides expert cybersecurity leadership tailored to your organization's size, complexity, and evolving risk landscape. Whether you need part-time guidance or full-time executive support, our flexible model ensures you get the right expertise at the right time.

Flexible Engagement Models

Our vCISO services are designed to scale with your business:

- **Minimum Commitment:** 10 hours/month
- **Scalable Support:** Up to full-time (160 hours/month)
- **Custom Hour Blocks:** Choose a set number of hours (e.g., 60/month)
- **Burst Capacity:** Temporarily exceed your monthly hours for project surges, then return to your standard rate

Note: Clients can fully customize their service package and add items beyond the standard offering.

Security Operations & Roadmapping

- 12–24 month integrated IT/security roadmap development

- Threat vector identification and monthly risk reporting

- Security gap analysis and remediation planning

- Oversight of security technology implementation

- Third-party risk management (TPRM) guidance

Leadership Development & Talent Support

- Coaching for IT/InfoSec managers, directors, and VPs

- Succession planning and CISO mentorship

- Interview support for IT/security candidates

Contractual Advisory for Your Legal Team

- Security input for client/vendor contracts

- Risk identification in contracts, controls, and vendor relationships

Technical Assessments

- Small business to enterprise Risk Assessments (technology, operations, standards, organizational, cyber, and compliance)

- Internal vulnerability scans, external, and application pen tests (scoped separately)

- Remediation planning and roadmap updates

- Pre-requisite identification for remediation (tools, time, resources)

Program Management or Program Creation

- Asset Management / ITSM

- Vulnerability Management

- IoT Management (general use, HIPAA, and SCADA environments)

- CMMC Compliance Management

- NIST, ISO, DFARS, FEDRamp, CIS, HIPAA, PCI, GLBA program management

- Change Management

- Pre-Certification Readiness Programs and Gap Analysis

- Evidence Collection Management and Standards

Technical Remediation

Our team is backed up by experts in network architecture, databases, automation, and platform-agnostic systems.

- Vendor-agnostic hardware solutions
- Implementation or repair of security tools and configurations
- Network as Code
- AI
- Virtual platform
- GRC tools
- Microsoft solutions
- Systems integration work

Our team can complement your IT staff, guide, or remediate issues for you. We provide full services and solutions, but do not sell software or hardware.

Planning & Strategy

• Strategic and tactical planning documentation

• Cost-benefit analysis

• Business analysis and risk reports

• M&A cybersecurity reports (as applicable)

• M&A risk management of human resources integration (IT and Security)

• Monthly status reports and executive summaries

Operational Governance

• Remediation plans in risk prioritization order

• Business analysis and risk reports

• Security spending and budget vs actuals

• Risk register and security roadmap with initiative tracking

• Policies, procedures, playbooks, and governance documentation

• Tool and vendor selection support

• Ongoing consulting and best practices guidance
