

MICROSOFT AZURE LABS FOR EDUCATION

Provide your students with the software and tools they need to advance their learning and skills. Enable them to access these tools from anywhere at any time with Microsoft Azure Labs. Book a demo of the platform today!

What is Azure Labs?

Azure Labs allows schools or businesses to create a lab of pre-configured virtual machines. This can enable your students to run intensive software like Python or CAD through Azure, allowing it to run on devices such as Chromebooks.

Benefits of Azure Labs

Security Features

Azure Labs will protect your school from unwanted external and internal security threats

Ease of Deployment

IT departments will be able to easily deploy all software to various students without any unnecessary hassle

Cost Savings

Save money by hosting all your software on Azure labs. Contact Datalink Networks to find out exactly what your school can save

Ease of Use for Teachers/Administrators

Your teachers will be able to easily use and manage the platform for their classrooms without the need for an IT specialist
