# UNIFIED COMMUNICATION SERVICES

Datalink Networks can help you select the right UCaaS solution, design a project plan, prepare you for migration, implement your selected solution, and support your organization after deployment. Get started on your Unified Communications journey today!

## 1. Assess IT Environment

To begin your journey to Unified Communications, we will conduct a discovery meeting to understand your current business communication environment, needs, and requirements.

## 2. Select UCaaS Solution

After assessing your IT environment, we will provide you with recommended solutions and plans to enable you to select the right UCaaS solution for your organization's requirements.

## 3. Design Project Plan/Proof of Concept

Once you have selected your UCaaS solution, we will design a formal project plan and/or proof of concept that will include details on the migration, configuration, and support process.

## 4. Prepare for Migration & Install Solution

Once you have approved our strategic project plan we will begin preparing you for migration. We can handle the implementation, integration, and configuration of your new unified communications solution.
